

# Renting a rooftop for solar power generation

How can you make money from a solar roof?

Solar rooftop leasing is one of the three basic ways you can make money from your rooftop with solar energy. The other two involve owning and operating solar panels on your own roof and joint venturing with a developer who will install the solar panels and share the income with you.

Is rooftop solar a good investment?

Rooftop solar has increasingly become an option for many households across the country. Many areas offer attractive Renewable Energy Credits (RECs) that, when coupled with federal and local incentives, can make rooftop solar an attractive financial choice that is also good for the environment.

Will my roof generate solar energy?

Realistically, your roof's solar generation potential will be less than that. It'll likely still exceed your typical household energy needs, but real-world constraints like roof space, sunlight exposure, and equipment specifications play a huge role in your panels' actual generation.

Can solar panels be installed on your roof?

While a growing number of property owners are investing in the installation of solar panels on their roofs - a new group of small to independent developers began exploring the feasibility of leasing rooftops, attracting investors and raising the money to pay for the solar installations.

Should you rent a roof if you have a PV system?

As a result, in any rooftop lease agreement, you need to know who is going to pay if roof repairs are needed, especially if PV system removal is required. In simple terms, if maintenance is not an integral part of the lease agreement, roof rental is not likely to be a lucrative deal in the long run.

How much solar power does a roof use a year?

Truthfully, way more than you probably need. According to our calculations, the average roof can produce about 35,000 kilowatt-hours (kWh) of solar electricity annually--more than three times the amount of electricity the average U.S. home uses annually.
