

Research on taxation of solar power generation enterprises

What are the different types of solar PV project tax?

The various types of solar PV project taxes are: 15% of income tax; 17% of value-added tax (VAT); 1.2% of land-use tax; 5% of urban construction tax with a payable VAT base; 3% of education surcharge to the central government with a payable VAT base; and 1% of education surcharge to the local government with a payable VAT base 43.

How effective are tax incentives for new energy industry?

The VAT incentives are insufficient to increase the corporate ROE. The policy impact has a time lag and heterogeneity across time. Tax incentives for new energy industry have been adopted at various stages of an emerging economy. However, there is little evidence on the effectiveness of tax incentives from the perspective of firm's profitability.

What is the tax policy of nuclear power industry?

Notice on tax policy of nuclear power industry. Tax refund after collection and proportional tax returns for the sale of nuclear power products. The return ratio consists of three levels of 75%, 70% and 50%. Notice on VAT policy for photovoltaic power generation. Notice on continued implementation of VAT policy on photovoltaic power generation.

Does government subsidies affect photovoltaic energy production in China?

This research was funded by the National Social Science Foundation of China (20BGL046). Government subsidies (GSs) have triggered a remarkable increase in the production capacity of photovoltaic (PV) electricity in China. However, the lack of core technologies has limited PV enterprises...

Do VAT incentives affect the ROE of New Energy Enterprises?

The results show that VAT incentives have an adverse impact on the ROE of new energy enterprises. This study further examines the variation of policy response in different locations of the industrial chain, and the time-lag and heterogeneity of China's new energy VAT refunds.

How profitable are distributed solar PV systems?

Approximately 92.73% of cities could achieve positive net profits for power generation from distributed solar PV systems, and 83.72% of all analysed cities showed an IRR greater than 8%, assuming a loan interest rate of 8%, which implied profitability. Grid parity indicates cost-neutral solar PV installations.

The tax payable for ground-based PV power generation mainly includes enterprise income tax, value-added tax and urban land use tax. On the one hand, VAT involves the deduction of ...

The Vietnamese government exempts the imported goods that constitute the fixed assets of solar energy

projects, and the land occupied by solar power generation projects ...

This paper aims to encourage power generation enterprises to actively carry out emission reduction activities by studying the impact of carbon emission reduction investment ...

According to the analysis of the current situation of China's wind power industry in the electricity market based on data from the State Grid, the relevant data from Clean energy installed ...

This research tries to fill this gap by scrutinizing the impact of R& D subsidies on the innovation in PV enterprises by applying the data of 70 Chinese listed enterprises from ...

Since the power unbundling reform in 2002, China's power industry has been a typical sector moving towards marketization. The supply-side structural reform that began in ...

In terms of value-added tax, the Ministry of Finance issued the "Notice on the Value-Added Tax Policies for Photovoltaic Power Generation" in September 2013, which stipulated that from 1 October 2013 to 31 December ...

Solar photovoltaic (PV) technology has developed rapidly in the past decades and is essential in electricity generation. In this study, we demonstrate the relationship between PV incentive policies, technology ...

Spain has become one of the leading countries in the world in promoting electricity generation from renewable energy sources (RES), due to their positive socioeconomic and environmental impacts ...

Renewable energy sources, notably wind, hydro, and solar power, are pivotal in advancing cost-effective power generation (Ang et al. 2022). These sources, being replenishable, do not emit harmful greenhouse ...

PDF | This article designs a simple experimental training platform for high-tech enterprises to charge solar photovoltaic power generation lead-acid... | Find, read and cite all ...

performance of straw power generation industry chain It promotes the implementation of agricultural enter-prise projects in the straw power generation industry chainofagricultural ...

Achieving the dual carbon goal is a profound and challenging social transformation. The difficulty is mainly reflected in the fact that economic growth is usually linked to energy consumption. In ...
