

Rooftop solar power maintenance service

Do rooftop solar panels need maintenance?

Rooftop solar systems need minimal maintenance, such as cleaning the panels periodically to remove dirt or debris. Most maintenance needs are covered under warranty, created by the system installer, which often includes monitoring, repairs, and parts replacement.

How do you maintain a rooftop solar system?

The maintenance of rooftop solar systems primarily involves cleaning the solar panels and inspecting the entire installation for damage or wear. Solar panels need regular cleaning to remove dirt, dust, and other debris such as bird droppings that can accumulate on their surfaces.

What are rooftop solar systems?

Rooftop solar systems, also known as photovoltaic (PV) systems, are solar power generation systems installed on rooftops of residential, commercial, or industrial buildings to harness solar energy for electricity generation.

What are the best practices for servicing and repairs of solar panels?

To ensure the efficient operation of solar panels, here are some best practices for servicing and repairs: Regular cleaning: Periodic cleaning of solar panels, particularly in dusty or polluted environments, helps maintain optimal performance. Use soft brushes or sponges and gentle cleaning solutions to avoid scratching the panel surface.

Are rooftop solar panels a good investment?

Protecting and caring for your investment is essential to owning any item. Thankfully, rooftop solar panels are incredibly durable and have no moving parts, and are therefore very easy to maintain. Even so, let's explore some basic tips to keep your system as productive as possible. Related reading: [How To Choose Solar Panels for Your Home](#)

How long does a rooftop solar system last?

A well-maintained rooftop solar system can last between 25-30 years. Solar panels' efficiency may decrease over time; however, modern panels often come with guarantees to maintain 80% efficiency even after 25 years of operation.
