How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

How does a solar PV system work?

Your solar PV system will typically come with a monitoring system that allows you to track its performance. Some systems even offer real-time monitoring through mobile apps, so you can see how much energy your system is producing. While solar systems generally require very little maintenance, it's important to keep an eye on:
