

Solar Mount Accessories Slot

Should you choose a mounting rack for a solar system?

Since it is a costly investment, the choice of mounting racks should not be disregarded as a minor consideration if purchasing solar systems or mounting solar modules.

Are solar panel mounting racks safe?

Like wood-made mounting racks, they may burn or even break if pressure on the solar panel (e.g. snow) is too high. Last but not least, iron-made mounting racks are also easy to work and slightly more expensive than wooden racks, but quickly fall victim to corrosion and are not recommendable in wet environments.

What are the different types of solar mounting structures?

In the solar market there are five basic types of mounting structures of which four are fixed-angle types (a-d) and one variable-angle type (e): a) roof mounted racks b) ground mounted racks c) top-of-pole mounted racks d) side-of-pole mounted racks e) tracking system mounted racks

What is the difference between top-of-pole and ground-mounted solar racks?

Therefore, ground-mounted racks are only recommended for secure locations preferably in clean and stable environments (with few snow or dirt on-ground). Top-of-pole mounted racks are structures where mounting poles are secured into the ground and tightened with concrete and the solar module is mounted on the top of the poles.

What is a side-of-pole mounted rack?

Side-of-pole mounted racks are normally used for solar systems that comprise a small number of modules. They are particularly used for remote lighting systems that already come with a pole where they can be easily attached to.

What are mounting racks made of?

Mounting racks can be made of different kinds of materials. Do not forget to ask your manufacturer about the material of his mounting structures in order to avoid wrong and post-project expensive choices. The majority of manufacturers of mounting racks use Aluminum.

About this item. Smarkey Solar Panel mounting Z brackets are very easy to use, and can adjust the size of the Z parts from 1.38 inch to 1.96 inch (35mm to 50mm). The Z Mounting Brackets ...
