

Solar Power Financing Report

Can you finance a solar panel installation?

Property Assessed Clean Energy (PACE) financing is another option some consumers have to finance certain home improvements, including solar panel installation on their homes. The CFPB has proposed rules for PACE financing as mandated by the Economic Growth, Regulatory Relief, and Consumer Protection Act of 2018. See 15 U.S.C. 1639c (b) (3) (C).

What percentage of solar projects are paid through loans?

Fifty-eight percent of solar projects were paid through loans in 2023, and the number of lenders is increasing accordingly. These lenders often partner with solar installers and employ a variety of marketing and door-to-door sales tactics to convince homeowners to enter into financing agreements.

Who contributes to solar energy financing?

As per IEA Key messages: Private actors are the main contributors to solar energy financing whereas public actors mainly contribute towards reducing risks for private investors and bringing new technologies and markets to maturity. Project developers and commercial financial institutions remain the key contributors of solar financing.

What does the CFPB say about solar loans?

In conjunction with today's report, the CFPB released a consumer advisory warning homeowners of the risky practices in the solar lending market and sharing advice for borrowers who encounter illegal activity. The U.S. Department of the Treasury also published information to help consumers as they shop for solar power.

Do solar loan fees increase the cost of a solar installation?

The report describes how fees often increase loan costs by 30% or more above the cash price, and that lenders often misrepresent the impact of the federal tax credit for solar installations. These loans are generally facilitated by lenders in partnership with solar installers and door-to-door sales companies.

Who provides funding for solar energy technologies?

Funding provided by the Solar Energy Technologies Office of the U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy. The views expressed in the article do not necessarily represent the views of the DOE or the U.S. Government.
