

Solar panels produced in the United States

Are there any American made solar panels?

And if you're looking to support American workers and energy independence, there are plenty of U.S.-made solar panels available. In fact, some of these panels (and the inverters they connect to) are among the top-rated, most popular solar equipment on the EnergySage Marketplace. Who are America's top solar manufacturers?

Why should you choose a solar panel that is made in America?

Choosing a solar panel that is made in the United States supports both American manufacturing and American jobs. Because these panels are designed and tested in the U.S., the specifications provided are true to the environment that you will use them in most of the time.

Where are solar panels made?

Four of the biggest manufacturers are headquartered in China and primarily manufacture equipment there (though one of them, Jinko Solar, does have an American manufacturing facility in Florida). The fifth largest manufacturer is a Canadian company, Canadian Solar, which also has a manufacturing facility in Texas.

Which companies make solar panels in the USA?

Here's more information about five of the biggest, best companies that make solar panels in the USA. The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Silfab, Jinko Solar, and Mission Solar. These companies produce high-performance solar panels for residential, commercial, and utility-scale installations.

Why are solar panels so popular in America?

In addition to the United State's growing ability to manufacture the components of solar panels, policy incentives, such as those that result in financial benefit for solar customers and tariffs on imported solar panels, have contributed to the rise in companies manufacturing their solar panels in America and consumers seeking them.

Are qcells solar panels made in America?

Although not all of their panels are American-made (at least, not yet), you'll still be supporting American manufacturing by choosing Qcells. Other notable names in American solar manufacturing include Solar4America, Silfab Solar, Heliene, Jinko Solar, and Mission Solar. Here's the full list, according to the DOE, as of July 2024:

The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Silfab, Jinko Solar, and Mission Solar. These companies produce high-performance solar panels for residential, commercial, and utility-scale installations.
