

# Solar power generation and electricity sales income

Can you sell solar power to generate income?

Contrary to popular belief, the financial benefits of solar energy don't stem from selling excess power back to the grid but from significant savings and credits. Unfortunately, selling your solar power to generate income is not a profitable option. You can't exactly sell the electricity your solar system generates back to the utility.

How much money can you make from solar energy?

In fact, in states like California, some homeowners can earn up to \$3,000 a year just by exporting extra electricity. As solar adoption grows, more Americans are discovering how this clean energy option not only cuts their energy bills but also offers a potential revenue stream.

Can you sell solar energy to a utility?

You can't exactly sell the electricity your solar system generates back to the utility. However, one of the biggest benefits of solar energy is its impact on your finances. Your solar energy system will save you money that you would otherwise spend on your monthly electricity bill from the utility company.

How do utilities pay for solar energy?

However, there are policies in place to govern how utilities compensate you for the electricity generated by your solar system. If you have a grid-tied solar system, you can send the surplus electricity back to the grid, which entitles you to a credit from the utility company, or they may purchase it from you at a nominal wholesale price.

How can people profit from solar energy?

People can also profit from solar energy by having solar panels installed on their own homes or businesses in order to take advantage of net metering to reduce utility bills. Investopedia requires writers to use primary sources to support their work.

Can solar panels make you money?

Imagine this: your solar panels are soaking up the sun, powering your home, and at the same time, making you money. This is the reality for many homeowners who sell excess solar energy back to the grid. In fact, in states like California, some homeowners can earn up to \$3,000 a year just by exporting extra electricity.

Solar renewable energy certificates (SRECs) are performance-based solar incentives that allow you to earn additional income from your home's solar energy production. As a homeowner, you can earn one SREC for every ...
