What is a solar power train?

Solar provides a compact, complete power train solution by coupling open ground modular systems with other balance of plant equipment, including interconnect piping, process coolers, local electrical equipment rooms, and other auxiliary systems.

Who is Solar Turbines?

Solar Turbines has been innovating the energy industry for more than 60 years and we will continue to push what is possible. Solar Turbine's modular solutions offer modular design with compact footprint, minimal construction and installation time, low cost, onsite continuous duty, and peaking power.

What is a boxpower solar container?

The BoxPower SolarContainer is a pre-wired microgrid solution with integrated solar array, battery storage, intelligent inverters, and an optional backup generator. Microgrid system sizes range from 4 kW to 60 kW of PV per 20-foot shipping container, with the flexibility to link multiple SolarContainers together or connect auxiliary arrays.

What solar container options does boxpower offer?

BoxPower offers standard SolarContainer options which we configure to fit your needs. BoxPower SolarContainers are highly configurable, with the ability to seamlessly adjust the solar, battery, and inverter capacities to optimally serve your energy loads. Component size ranges for a single container are as follows:

What is a solar modular system?

Solar's modular solutions products change the nature of site stick-built construction, shifting from labor-intensive activities to much simpler assembly tasks. The use of modular, pre-fabricated equipment saves time, results in a decreased risk of schedule delays, and lowers total installed project costs. Other features include:

What is a solar thermal power plant in India?

The plant will be one of the first utility-scale solar thermal power plants that is commissioned in India. This project is part of the Indian government initiative to incentivize the growth of solar power to 20,000 megawatts by 2020.
