By leasing land to solar developers, landowners can receive long-term passive income with predictable rates as well as a vast range of other benefits. Learn how a solar land lease might be right for you! What is a Solar Land Lease?

How long is a solar land lease?

A solar land lease typically is a long-term agreement spanning twenty to forty years. Several factors can determine the lease length, such as the life span of the solar equipment and the return on investment (ROI) for the solar company leasing the land. Landowners receive rental payments monthly from the solar developer based on per-acre use.

Does leasing land for solar farms pay off?

Landowners and communities throughout North America are seeing first-hand how leasing land for solar farms and other renewable energy projects pays off. Allocating a portion of your land to lease for an energy project opens up a diversified and dependable income stream.

Should landowners negotiate a solar lease agreement?

On the other hand, landowners are usually motivated to limit the land affected by solar lease agreements to retain control over non-solar-related uses and leasing opportunities. Therefore, careful consideration and negotiation of the land subject to the lease agreement is crucial early in the process.

How do I get a land lease for a solar farm?

You'll need to connect with a solar developer to secure a land lease for a solar farm.
