

Solar power sun room

Is it necessary to heat a sunroom?

If you apply these principles, you shouldn't need to heat a sunroom -- you will be able to keep this living space at a comfortable temperature by using natural systems. Would a sunroom work for your house?

What are the benefits of having a sunroom?

A sunroom, also known as a sunspace, is a productive living area in your home with various benefits. In spring and summer, it provides a relaxing living space. In winter, it's an excellent place to grow food plants. Additionally, it can help heat your home.

Can a sunroom function as a greenhouse?

Follow these principles when building a sunroom addition and you can get the triple benefits of a cozy living space, free solar heat, and a super greenhouse for plants.

What makes a sunroom a great addition?

Sunrooms are the perfect four-season addition to increase the view and create a focal point for any home or business. Solar Innovations' custom designed structures include durable aluminum framework. They are tailored with the most comprehensive line of aluminum accessories in the industry.

Are DIY sunroom kits better than professional sunroom installation?

DIY sunroom kits are great for experienced craftsmen, but it's important to understand that screened porch kits do not have as many customizable options as our professionally installed sunrooms. Learn more about [DIY Sunroom Kits vs. Professional Sunroom Installation](#). [Order a Sample Kit](#)

Do sunroom design strategies work in all climate zones?

If your location receives at least four hours of sunlight around midday in midwinter, the answer is yes! The sunroom design strategies described in this article will work in almost all U.S. climate zones and southern Canada.

Designed for easy installation, our do-it-yourself [EasyRoom](#) sunroom and aluminum screen room kits come with a step-by-step instruction manual and a full five (5) year warranty providing peace-of-mind protection for your investment.

Because of their location, the roof of a sunroom is a terrific place to install solar panels. A large 20'x20' sunroom could hold enough panels to generate 6000 watts of power. Even a small 11'x12' sunroom 1980 watts ...
