If you have a roof of area 200~300 Sq. Ft. If you have a roof of area 300~500 Sq. Ft. If you have a roof of area 500~700 Sq. Ft.

Does SRP offer a residential solar price plan?

SRP offers flexible residential solar price plans so you can choose one that's right for you. SRP offers demand- and export-based plans for customers with existing rooftop solar systems or other energy-generating capabilities. Find the best fit for your lifestyle. Ideal for customers who produce some of their own energy.

How much solar power does a roof generate?

In a perfect world, the average roof in the U.S. can generate around 35,000 kilowatt-hours (kWh) of solar electricity annually--far more than the average home's annual electricity usage of 10,600 kWh. Realistically, your roof's solar generation potential will be less than that.

Why should you invest in a solar roof in India?

India is on the cusp of a solar revolution and we at Tata Power Solar have been right at the forefront, leading the move towards sustainable energy solutions. Investing in rooftop solutions leads to great savings, while protecting the environment. Tata Power Solar offers solar rooftop for home. Save and Earn from your idle rooftop space.

What is a customer generation price plan?

Oftentimes, customers who have solar panels need to supplement the energy they generate with power from SRP. Much like the SRP Time-of-Use (TOU) Price Plan, the Customer Generation Price Plan allows you to save money on your electric bill by using less electricity during on-peak hours.

Should solar panels be installed on a south-facing roof?

Ideally, your solar panels will be installed on a south-facing roof at an angle of about 30°. These are the optimal conditions for solar panel production. The closer you get to this, the more electricity your panels produce. Solar panels with a larger power-to-size ratio will produce more electricity per square foot.
