How do I install a solar panel using screw piles?

Before installing your solar panel using screw piles, contact one of our certified installers so that they can determine the type, amount, and location of the helical (screw) piles to be installed. Depending on your project, they will be able to estimate the costs. Rapid installation Minimal impact to the landscape No excavation

What is a solar pile structure?

Solar pile structures are foundational components supporting solar panel arrays, often composed of durable materials like steel or aluminum. These vertical supports anchor the panels securely to the ground, ensuring stability and resistance against environmental factors.

How do I choose a pile for a solar farm?

The load-bearing capacity needed for the solar farm is another critical factor in selecting the type of pile. Projects requiring high load capacities--such as those with large, heavy solar panels or in regions with significant wind forces--may necessitate the use of concrete or composite piles.

Why should you choose galvanized steel screw piles for solar panels?

Because they represent a major investment, solar panels must be able to withstand the harshest weather conditions and have a long lifespan. With their durable and solid design, galvanized steel screw piles offer the most cost-effective solution for anchoring solar panels for the long-term.

Are goliathtech screw piles good for solar panels?

With the help of our certified installers, GoliathTech's screw piles will support the foundation of your solar panel for many years to come. Finally, don't forget that screw pile foundations are much more economical than traditional concrete foundations. This is another advantage that can't be overlooked!

What considerations should be taken during installation of solar panels?

During installation, several key considerations must be taken into account to ensure the success of the project. Alignment is crucial; maintaining proper alignment of the piles is essential to prevent issues during the installation of solar panels.
