

SunRain Solar Bracket Installation

Can I buy a sunrain solar water heater in Australia?

Congratulations for purchasing a high quality Sunrain Solar Water Heater, designed in Australia for Australian conditions. This water heater must be installed and serviced by a qualified person. Hand this manual to the homeowner for future reference. Note - the Warranty page requires your signature for future reference.

Are sunrain evacuated tube solar collectors a good choice?

SunRain Evacuated Tube Solar Collectors are the most cost-effective collectors on the market they offer the best performance at the best price **THE BEST VALUE AVAILABLE!** SunRain Evacuated Tube Solar Collectors out-perform all major competitors and are available for hundreds of dollars less.

Why should you choose sunrain?

At the same time, Sunrain uses her excellent technical advantages and production capacity to supply quality and certified products including solar water heater, photovoltaic panel, LFP battery, heat pump and so on.

Should solar panels be covered if drained?

If drained at any time then the solar panels should be covered as prolonged exposure to sun without a supply of coolant water may cause damage. Water stored in the storage tank is heated automatically by an electric booster element which is controlled by an automatic thermostat.

How do I connect two solar panels to a rail?

Position the two solar collectors evenly across the rail. Connect the panels using the 22mm couplings and tighten carefully using two spanners to avoid and damage to the copper tubes of the collectors.

Should I Cover my solar hot water system?

Ensure that your solar hot water system is filled with water at all times. If drained at any time then the solar panels should be covered as prolonged exposure to sun without a supply of coolant water may cause damage.
