

The harm of drilling holes in the roof of photovoltaic panels

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

Do solar panels need holes?

One of the biggest concerns for property owners is the holes needed in their roofs to secure their solar panels. During installation, workers will drill holes in your roof to secure the racking which will hold your panels. These holes are for lag bolts, which secure your panels to your roof, and are designed to withstand extreme weather.

Can solar panels cause a leaky roof?

Solar panels themselves do not cause leaky roofs. However, if the installation is not done correctly or if the roof is not properly maintained, it may lead to leaks. It is essential to work with experienced professionals and conduct regular inspections to ensure the integrity of the roof. How long does a roof last under solar panels?

Are roof penetrations dangerous?

Roof penetrations, which entail cutting holes on the surface of the roof to secure solar panel mounting systems, have the potential to jeopardise the roof's structural integrity and add sites of water ingress. If these dangers are not properly managed, they may result in leaks, moisture damage, and even structural failure.

Do solar panels need a roof penetration?

However, installing solar panels frequently necessitates roof penetrations, which can provide serious concerns if handled improperly. Installers must use strategies that successfully reduce the risks of roof penetration to guarantee the long-term integrity of both the roof and the solar system.

How do I avoid solar on my roof?

Another option to avoid solar on your roof entirely is to install a ground mount or join a community solar plan and receive solar energy from an offsite location. A rooftop solar panel installation is a great investment that won't lead to roof damage when you work with a professional, experienced installer.
