What are the applications of photovoltaics?

Conclusions Photovoltaics have a wide range of applications from stand alone to grid connected, free standing to building integrated. It can be easily sized due to its modularity from small scale (portable) to solar field scale. It is a source of clean energy with no GHG at generation, transformation and usage.

Should a photovoltaic system use a NaS battery storage system?

Toledo et al. (2010) found that a photovoltaic system with a NaS battery storage system enables economically viable connection to the energy grid. Having an extended life cycle NaS batteries have high efficiency in relation to other batteries, thus requiring a smaller space for installation.
