

Total solar power generation in the world

In 2023, all solar PV operators together produced about 12 percent of the country's net power consumption, contributing to a total renewable power share of 52 percent. Solar power's global ...

Box 2. Solar Power in the National Electricity Mix. Utility-scale solar accounts for around 8% of the nation's capacity from all utility-scale electricity sources (including renewables, nuclear ...

Power generation from solar PV increased by a record 270 TWh in 2022, up by 26% on 2021. Solar PV accounted for 4.5% of total global electricity generation, and it remains the third largest renewable electricity technology behind ...

Ember (2024); Energy Institute - Statistical Review of World Energy (2024) - with major processing by Our World in Data. "Share of electricity generated by solar power - Ember and Energy Institute" [dataset]. Ember, ...

In 2025, renewables surpass coal to become the largest source of electricity generation. Wind and solar PV each surpass nuclear electricity generation in 2025 and 2026 respectively. In 2028, renewable energy sources account for ...

Ember (2024); Energy Institute - Statistical Review of World Energy (2024) - with major processing by Our World in Data. "Electricity generation from solar and wind power - Ember and Energy Institute" [dataset]. Ember, "Yearly Electricity ...

China added a record 301 GW of renewable power generation capacity including solar, wind and hydro in 2023, accounting for around 59% of the world's total renewable capacity additions last year. It added 216 GW of ...

2050 MW Pavagada Solar Park, India's second-largest in Pavagada, Karnataka. Solar power in India is an essential source of renewable energy and electricity generation in India. Since the early 2000s, India has increased its solar power ...

In our long-term projections, the electric power sector continues to produce the most solar generation, increasing from 68% of total solar generation in 2020 to 78% in 2050. The growing share of utility-scale ...

In our long-term projections, the electric power sector continues to produce the most solar generation, increasing from 68% of total solar generation in 2020 to 78% in 2050. ...
