

# Tutorial on making a solar bracket

How do I build a DIY solar panel stand?

The first step when building your DIY solar panel stand is to determine the proper angle for your panels. This will depend on your location and the amount of sunlight your panels will receive. Once you have this information, you can begin designing your stands and gathering the necessary materials.

How do I Mount my solar panels?

Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the EcoFlow Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels.

How to install a solar panel rack?

The first step is to measure your solar panels. To get the correct measurements you need to install the mounting brackets on the solar panels. The height of the rack doesn't have to be the full height of the panel, but it does have to be tall enough so that the mounting brackets attach to the rack.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do you build a solar box frame?

Notice the outside boards of the box frame are turned on edge and the inside runners are flat and flush with the top. The first step in building the frame is to build a basic box. The height will be the measurement from the bottom of the solar panel to the top of the upper bracket on the solar panel.

How do you measure a solar panel rack?

To get the correct measurements you need to install the mounting brackets on the solar panels. The height of the rack doesn't have to be the full height of the panel, but it does have to be tall enough so that the mounting brackets attach to the rack. Now measure the width of the panel including the mounting brackets.
