

U S Microgrid Market Status

What is the global microgrid market size?

The global microgrid market size was valued at USD 9.88 billion in 2023 and is projected to grow from USD 11.24 billion in 2024 to USD 37.35 billion by 2032, exhibiting a CAGR of 16.19% during the forecast period. Asia-Pacific dominated the microgrid market with a market share of 43.02 % in 2023.

How big is the microgrid market by 2033?

By 2033, the microgrid market size is expected to progress at a 12.3% CAGR. Government stimuli and environmental problems spur the adoption of hybrid microgrid. Manufacturers should prioritize scalability, integration with renewable energy sources, and regulatory compliance to prosper.

What are the major trends in the microgrid market?

A significant trend in the microgrid market is the integration of renewable energy sources. Efficiency is improved by the emergence of smart microgrid with sophisticated control system. Energy storage innovations are essential to the market growth of microgrid. Adoption of microgrid is encouraged by government regulations and incentives.

Is the US microgrid market on track for a record year?

Elham Akhavan, senior research analyst at Wood Mackenzie, said: "Despite the global COVID-19 pandemic and associated macroeconomic challenges causing a 2-year slowdown in the US, the microgrid market is developing at a rapid pace and 2022 is on track to be a record year for installations and scheduled pipelines.

Why is the microgrid market growing in 2022?

The microgrid market saw significant growth between 2018 and 2022, fueled by factors such as rising distributed energy systems resilience awareness, concerns about climate change, and technological improvements. Energy industry business executives and entrepreneurs have been attentively watching this development.

How is the microgrid market segmented based on grid type?

Based on grid type, the microgrid market is segmented into AC microgrid, DC microgrid and hybrid. The hybrid segment is set to expand at a CAGR of over 20.9% through 2032. Growing adoption of solutions offering substantial economic advantages by reducing energy costs and providing financial resilience is fostering the product demand.

What is Microgrid & Market Status [2024-2032] - "Microgrid Market Size" - A microgrid is a self-sufficient energy system that serves a discrete geographic footprint, such as ...

The US microgrid market reached 10 gigawatts (GW) in the third quarter of 2022, with more than 7 GW in operation and the rest in planning or construction stages, according to latest analysis from Wood Mackenzie's
