What is a solar generator?

Solar generators are portable battery storage systems powered by solar panels. Unlike solar-plus-storage systems, solar generators are not designed to back up major appliances in the event of an outage. You can compare solar generators by assessing the watts and watt-hours of the systems, as well as their battery chemistries.

Can a solar generator power a house?

If you're looking to power your entire house on a backup generator system, solar may not be the way to go. You can easily recharge small electronics and operate certain appliances with a solar generator but don't expect to be able to keep your fridge, TV, and lighting systems all operational for very long.

Can a solar generator be used as a whole home power backup?

Given their portability and ease of operation, solar generators offer a unique energy solution for those on the move who need some extra electricity. That being said, the limited power capacity, slow recharge time, and dependence on the sun limit the usability of solar generators as whole home power backup systems.

Are solar panels a generator?

Solar panels can't act as generators on their own - the electricity they generate needs to be stored somewhere. So, solar generators typically consist of two main products: solar panels and a battery storage system. When you place your solar panels out in the sun, they generate direct current (DC) electricity.

What is a solar backup generator?

Solar backup generators are designed to power up when the electrical grid fails and are an efficient alternative to installing a complete system. These generators use several batteries to store energy for high-wattage output. They provide sufficient backup power to turn on lights, televisions, computers, and small to midsize appliances.

Can you store solar energy with a solar generator?

Storing solar energy with a solar generator has limitations when it comes to energy capacity. If you're looking to power your entire house on a backup generator system, solar may not be the way to go.
