Solar panels are the key component in any residential, commercial, or utility-scale solar energy system.

How much does a solar panel installation cost?

The best way to evaluate the price of a solar panel installation is in dollars per watt (\$/W). Similar to comparing dollars per square foot when shopping for a home, \$/W helps standardize the cost of solar by showing the cost of solar on a per watt basis. Currently, the average price of a solar panel system installed in the U.S. is \$2.91/W.

How much does a polycrystalline solar panel cost?

Polycrystalline solar panels have efficiency ratings ranging from 13% to 20%. Due to lower production costs, they generally cost between \$0.75 and \$1 per watt. Thin-film solar panels are rapidly improving in efficiency and durability and now experience ratings of between 9% and 18% and rising.

Can you buy solar panels from a wholesale reseller?

Wholesale resellers sell equipment online to consumers looking to go solar. While labeled as "wholesale," these items will still typically include a markup so that the company selling the product will make a profit. It's currently not possible for consumers to purchase wholesale solar panels directly from panel manufacturers.

Should you buy or lease solar panels?

Buying them outright is generally cheaper and is advisable if you can afford it. But with solar panel systems having such a hefty price tag, leasing or financing may be the only feasible option for you. Solar loans work similarly to home improvement loans, and you may be able to get a low interest rate to make this an appealing option.
