With a large quantity of high-quality solar panels at your disposal, you can tackle projects of any scale with ease.

What is a 'solar panel rate' scam?

This is a common scam used to gather personal data and/or trick people into signing long-term solar lease agreements that are far less favorable than owning solar panels. For example, in February 2023, a Facebook page called "Solar Panel Rate" ran multiple ads claiming Elon Musk was paying homeowners \$2,500 to test out new solar technology.

Can solar panels save money on energy costs?

Yes, homeowners across the US can save money on energy costs by powering their homes with solar panels instead of purchasing electricity from a utility. This is especially true following the rapid rise in grid electricity rates in 2022 and 2023.

How can I reduce the cost of solar panels?

Some examples include: It's well worth spending 5-10 minutes searching for solar incentives through your state, county, city, and utility provider. The next way to reduce the cost of solar panels is to shop for the lowest price like you would for cars or a new pair of hiking boots.
