

Xiaomi mobile phone photovoltaic panel

Does Xiaomi have a solar panel?

Some of Xiaomi's recent phones like the Mi 9 and Mi 8 Pro utilized see through rear glass, so this could accommodate the solar panel. While there isn't any additional detail to go on from the WIPO patent, the solar panel seems to be pretty clearly intended as a means to recharge the phone's regular battery.

How does a solar panel work on a Xiaomi Phone?

The camera module sticks out beyond the rear panel, while the solar sheet sits flush, or perhaps even below the rear glass. Some of Xiaomi's recent phones like the Mi 9 and Mi 8 Pro utilized see through rear glass, so this could accommodate the solar panel.

Does Xiaomi have a solar case?

While Xiaomi's design would be the most high profile case to date, isn't the first time we've seen solar energy integrated into phones. Samsung's Guru E1107 Crest Solar used a similar design (albeit for a much less power-hungry phone) and LG toyed with the technology with a solar case for the GD510 back in 2010.

Will Xiaomi ever make a solar-powered phone?

There's no guarantee we'll ever actually see a solar-powered phone from the Chinese brand. Though, considering Xiaomi is reportedly invested in new charging tech like reverse wireless charging, it wouldn't be too much of a stretch.

Could a solar-powered smartphone solve battery drain?

Phone users in sunny climates may someday have a solution to battery drain thanks to a newly-unearthed patent for a solar-powered smartphone from Xiaomi.
