

Zhejiang University Microgrid

Zhejiang University ... Islanding detection based on current disturbance of selected frequency is gaining widespread acceptance in dc microgrids due to its high detecting accuracy and good power ...

Capacity optimization of hybrid energy storage system for flexible islanded microgrid based on real-time price-based demand response. The islanded microgrid (IMG) is universally accepted as an...

Wei Wei received the B.S. and M.S. degrees in control engineering from Zhejiang University, Hangzhou, China, in 1983 and 1986, respectively. ... Decentralized Coordination Control for ...

Zhejiang University | ZJU ... With the rapid development of the information and communication technology in DC microgrids (DCmGs), the threat of deception attacks has been widely recognized ...

Qiang Yang's 174 research works with 3,154 citations and 5,090 reads, including: Low carbon oriented collaborative energy management framework for multi-microgrid aggregated virtual ...

Rujing Zhang's 3 research works with 1 citations and 73 reads, including: Polar-Frame-Based Modeling and Small-Signal Stability Analysis of DDSRF-PLL: On the Different Implementation ...

Zhejiang University ... Islanding detection based on current disturbance of selected frequency is gaining widespread acceptance in dc microgrids due to its high detecting accuracy and good ...

Zhejiang University of Technology - Cited by 3,756 - Smart Grids - Distributed Control - Distributed Optimization ... Voltage restoration and adjustable current sharing for DC microgrid ...
