

Expanding solar power

Can I expand my SunPower solar system?

When you start the process of expanding your system, your provider will review your existing setup. SunPower solar systems are designed to last decades, so replacing an entire solar system in order to add additional solar panels is a rare occurrence.

Should I expand my solar panels?

Some common reasons to expand your solar panels are getting an electric vehicle, installing a battery, electrifying your home, or making home upgrades like an addition or a new pool. You may not know where to begin if you think you need more solar.

When should I expand my solar system?

Once you've settled into your home and get a better sense of your solar energy production and energy consumption, you might want to cover more of your electricity use. Often homeowners can determine whether they need to expand their system around one year after installing solar power.

Should I replace my solar system for an expansion?

However, if your solar system is older and incompatible with your desired expansions, you may choose to replace the system altogether or run a separate system alongside your solar panels. Do I need to stick with my original solar installer for an expansion?

Can I add additional solar panels to my existing solar system?

This means that additional solar panels can easily integrate into the existing solar system and solar monitoring process. However, if your solar system is older and incompatible with your desired expansions, you may choose to replace the system altogether or run a separate system alongside your solar panels.

Do solar panels increase electricity use?

In many cases, you may see an increase in your electricity use after installing your solar panels. The thought of producing "free" electricity tends to make solar customers more relaxed about their energy use. If you start leaving your lights on more often, you may want to install more panels to account for the additional usage.

Here are five factors to consider before making plans to expand your solar power system. No. 1: Space for Solar Panels. Do you have room for more solar panels? If your photovoltaic array ...
