

Hillhouse 1 5 billion microgrid

Can microgrids improve energy resilience?

Since microgrids are not the only way to enhance energy resilience, communities may want to consider alternate resilience investment options, including hardening existing transmission and distribution systems, weatherizing power generation sources, and building additional distribution systems to provide energy supply redundancy.

Are microgrids a good investment?

Microgrids that incorporate renewable energy resources can have environmental benefits in terms of reduced greenhouse gas emissions and air pollutants. In some cases, microgrids can sell power back to the grid during normal operations. Depending on the complexity, microgrids can have high upfront capital costs.

What is the building a better Grid Initiative (TFP)?

The TFP, administered through the Building a Better Grid Initiative, is a revolving fund program that will provide Federal support to overcome the financial hurdles in the development of large-scale new transmission lines and upgrading existing transmission as well as the connection of microgrids in select States and U.S. territories.

What is a grid resilience formula grant?

Grid resilience formula grants may be used for activities, technologies, equipment, and grid hardening measures to reduce the likelihood of and consequences of disruptive events. Additional resources pertaining to microgrid development, as well as alternate uses of 40101(d) grid resilience formula grants.

Cannabis industry microgrids bring environmental responsibility, huge savings, to energy-intensive growing market. Last month, we reported on Scale Microgrid Solutions" ...

Hitachi Energy plans to invest an additional \$1.5 billion to ramp up its global transformer manufacturing capacity by 2027, in addition to the previously announced \$3 billion ...

The other provision many Democrats oppose removes strict climate-smart requirements for the use of roughly \$13 billion in conservation funding from the Inflation Reduction Act when those dollars ...

With 39 co-sponsors, the bill authorizes \$1.5 billion in annual grants for clean energy microgrids to support critical infrastructure needed after extreme weather events. It also offers \$50 million a year for technical ...

The bill authorizes \$1.5 billion a year for grants for clean energy microgrid projects over 10 years as well as \$50 million a year for technical assistance and outreach. If the bill becomes law, Congress would have to ...
