

# Is it suitable to install photovoltaic solar panels

Why should you choose a solar installer?

Your solar installer can help you determine the right choice. More efficient solar panels, such as monocrystalline panels, offer the best power output and efficiency. Some benefits of installing solar panels include lowering or eliminating your energy bills, reducing your carbon footprint, and granting you access to tax credits and rebates.

Can you install solar panels on a roof?

However, you will need solar batteries to store excess energy to use at night and when it's overcast. You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels.

Can solar panels be installed on the ground?

You can install solar panels on the ground, but are more expensive to install and require additional space. Consult a reputable solar panel installer to confirm whether your roof is compatible with solar panels. You'll see the best return on investment if you install solar panels on a home you plan to stay in for a while.

Should you install solar panels before buying a home?

The age and condition of your roof also matter. If your roof needs repairs or replacement soon, it's best to address that before installing solar panels. Solar panels are an attractive feature to buyers and typically increase a home's value. That means you may be able to recoup some of your installation costs if you need to sell in the future.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels.
