Are solar panels worth it?

Solar panels can generate major savings if you're trying to reduce your electricity costs, carbon emissions or both. The primary factor in determining whether or not solar panels are worthwhile for you is the cost you're currently paying for electricity. The higher your electricity costs, the more a solar panel system will save you in the long run.

What is a 'solar panel rate' scam?

This is a common scam used to gather personal data and/or trick people into signing long-term solar lease agreements that are far less favorable than owning solar panels. For example, in February 2023, a Facebook page called "Solar Panel Rate" ran multiple ads claiming Elon Musk was paying homeowners \$2,500 to test out new solar technology.

How are PV production costs modeled?

The costs of materials, equipment, facilities, energy, and labor associated with each step in the production process are individually modeled. Input data for this analysis method are collected through primary interviews with PV manufacturers and material and equipment suppliers.

Can solar panels save money on energy costs?

Yes, homeowners across the US can save money on energy costs by powering their homes with solar panels instead of purchasing electricity from a utility. This is especially true following the rapid rise in grid electricity rates in 2022 and 2023.

Do solar panels increase home value?

In particular, over 50% of surveyed individuals were impressed by the energy independence they gained from adding panels. Over 30% of homeowners noted an increase in their home value, and 42.2% of folks reported that they reap increased environmental benefits as well.
