What is a photovoltaic pile driver?

Photovoltaic Pile Driver Configuration Solar Pile Drilling Method - totally three different drilling procedure for PV drilling as following The pile driver drive the auger into soil directly by rotating, it is only for the soft ground such as soil, sand, soft clay. When drilling for hard formation like rock, hard clay.

What is a hardrock solar pile driver?

Hardrock solar pile driver can drive the pile into soil or rock to support the solar panel for solar power station system and guardrail installation, the common application is for Photovoltaic panels installation There are several type Photovoltaic rig, from manual rig, to semi-hydraulic pile driving machine to fully hydraulic drilling rig

Are helical piles good for solar panels?

Helical piles and micropiles work well in compression and tension applications and are ideally suited for solar panel installation. What are the differences between drilled shaft and helical piles? What equipment options are available for their installation?

How many types of photovoltaic rigs are there?

There are severaltype Photovoltaic rig,from manual rig,to semi-hydraulic pile driving machine to fully hydraulic drilling rig Hardrock PV piling machine includes DS100,DS200,DS300,DS300H totally four different model. It can be selected based on the pile shape and depth Photovoltaic Pile Driver Configuration

How to install a solar pole in a rig?

Rig has to works with air compressor together for percussion drilling. In this way,it can make a borehole firstly,then put the pile inside or concreting a pile. When it needs to install the solar pole in more efficiency way and have it stably installed,hammering the pile into ground directlyis the best way.

How deep is a drilled shaft pile for a solar array?

Drilled shaft piles for solar array footings can vary anywhere from 6 to 24 inches in diameter and 5 to 30 feetdeep,depending on site conditions and other variables. The drilled shaft or borehole is filled with high-strength cement grout or concrete. At times,steel casing or re-bar is used for reinforcement.
