Are solar panels a viable option?

Solar savings calculator. To figure out if installing solar panels is a financially viable option, you need to determine a solar savings calculator. This one calculates how much you save with solar energy-based electricity generation per year. Many households save more than \$1, per year, for example. Solar panel cost payback calculator.

Are solar panels a good investment?

Click here to get in touch for a free consultation or give us a call at 1-800-472-1142. Solar panels are expensive up front, but a great investment in the long run. Don't take our word for it, use our solar ROI calculator and see for yourself.

Do solar panels reduce energy costs?

Homes with PV solar panels have drastically-reduced energy costs. Since most or all of your energy is self-produced, you won't have large electricity bills anymore. Many homeowners have used solar to reduce their electric bills to \$0. And if your PV solar array produces enough energy, the electric company may even start paying you.

Are solar panels worth it if you sell your house?

This is called the "break-even point" -- or the point solar panels become worth it financially. If you plan to sell your house sometime soon, the shorter the break-even point, the better -- although you'll likely recoup the cost of your solar system in the home sale.
