How to install solar panels?

Once racks are in place, installers have to carefully place solar panels on them while utilizing suitable clamps or mountings. The solar system needs to be wired after mounting equipment's. Electrical conduit should run from various parts like inverters, disconnects, electrical panels to the solar panels among others.

How do I choose a solar installer?

Decide between a DIY or professional install. Solar involves electrical work on rooftops, only attempt DIY if you have experience. Hire a reputable, licensed solar contractor if using professionals. Verify they have an electrician on staff. Have the installer provide a detailed plan with panel placement, wiring runs, and electrical connections.

Can I install solar panels in my apartment?

Consumers who live in apartments or rental homes may not be allowed to install solar panels. You can ask your landlord or rental management company whether solar is permitted. If not, community solar programs are an alternative to installing rooftop solar.
