

# Recommend a solar generator

Are solar generators a good option for your home?

Solar generators are quiet, lack any harmful fumes and exhaust, and are completely renewable. With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone.

How to choose the best solar generator?

The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice. A generator's maximum output should be much higher than its max input.

What is a good portable solar generator?

If you want a portable solar generator that can power most appliances, the Jackery Explorer 2000 Pro is a good pick. It comes with a built-in 2200W inverter, meaning it can power most household appliances including a full size refrigerator, TV, blender and others. You can also run power tools off the 2000 Pro.

Should you buy a solar generator?

Solar generators are advantageous for those looking to run devices and small appliances. They're a great source of backup power for a boating or RV camping trip because of their portability, plus they're clean and don't require you to keep lots of fuel on hand.

Which solar generator kit should I buy?

If you want a complete home backup solar generator kit that's ready to use, I recommend this EcoFlow Delta Max solar generator + 220W solar panel combo. It's enough to keep your most essential appliances powered and devices charged during an extended blackout. Complete solar generator kit with foldable solar panel.

What size solar generator do I Need?

If you want backup power for two days, you'll need a pretty big solar generator. Generally, the same criteria that applies to power output also applies to capacity. In fact, you'll find that the power output and capacity on most solar generators are roughly matched. For small appliances and electronics a 200Wh-700Wh solar generator is ideal.

See It Why it made the cut: This Jackery solar generator delivers the best blend of capacity, input/output capability, portability, and durability. Specs. Storage capacity: 2,160Wh Input capacity ...
