Based on the average cost of solar in 2024, a 6 kW solar system in the U.S. will cost about \$18,000. With the 30% federal tax credit, the solar system price drops down to about \$12,000.

How much does a solar panel cost?

Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300. The cost of a solar panel also depends on how you buy it. If you purchase through a full-service installer, you will likely get a lower price for each panel than buying them individually from a retail store.

How much does a 5000 watt solar system cost?

A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, a 5,000 Watt solar system (5 kW) would have a gross cost between \$15,000 and \$25,000. The price per watt for larger and relatively straightforward projects are often within the \$3-\$4 range.

How much does a 400 watt solar panel cost?

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.

How much does solar installation cost?

Installation labor accounts for around 5.5% of the total cost of a residential solar project, according to a 2022 report from the National Renewable Energy Laboratory. That amounts to \$1,375 for a \$25,000 solar project.

How much does a solar battery cost?

The cost of solar batteries varies widely based on type and capacity. On average, a residential lithium-ion battery system, including installation, ranges from \$7,000 to \$14,000. While this represents a significant investment, the long-term savings and security benefits can make it worthwhile for many homeowners. Power Your Home With Solar
