

Switch cabinet cannot store energy manually

What if a Powerplus Energy Cabinet is damaged?

All cabinets from PowerPlus Energy are designed to be transported empty of batteries and heavy PCE. A damaged cabinet should not be used and should be returned to PowerPlus Energy or disposed of via a recycling facility.

How do you close a power switch?

To close the switch, the handle is inserted into the spring charging cam, then rotated upward through an angle of 120 degrees. This action charges the operating spring, and as the mechanism is forced past toggle, the stored energy of the spring is released and transferred to the main shaft that snaps the switch closed.

Can Powerplus energy cabinets be shipped on a pallet?

PowerPlus Energy's cabinets can be large and heavy and should be shipped in the original manufacturer's packaging and secured to a pallet. Cabinets should not be top loaded and care afforded to ensure no damage occurs from fasteners. All cabinets from PowerPlus Energy are designed to be transported empty of batteries and heavy PCE.
