

Trina 450 photovoltaic panel power

What is Trina 450 W photovoltaic module?

Trina 450 W photovoltaic module from the Vertex S+ range is made of monocrystalline cells with 210 silicon wafer in i-Topcon N-type technology. Vertex S+ has several innovative design features that allow it to achieve high output power. Perfect temperature coefficient and low irradiation efficiency provide even more power.

How much power does a Trina Solar panel produce?

The TallMax 5BB,385-410W - TSM-DE15H (II) can achieve up to 410W with a 20.2% efficiency, and the TallMax 345-385W - TSM-DE14H (II) can attain a 385W output with a 19.9% efficiency. The high efficiency and power output of Trina Solar panels means that homes don't need many panels on the roof.

Is Trina Solar a black solar module?

Trina Solar has presented an all-black version of its Vertex S+ solar modules for residential applications. The Chinese solar module manufacturer said that the new NEG9R.25 product has a power output of 450 W. It measures 1,762 mm x 1,134 mm x 30 mm and weighs 21 kg. The modules use glass on the front and back are each 1.6 millimeters thick.

Are Trina Solar solar panels a good choice?

Their mechanical resilience is also purportedly high, according to Trina Solar. It said they can withstand snow loads of up to 5,400 Pascals and wind loads of 4,000 Pascals. Trina Solar offers a product guarantee of up to 25 years and a performance guarantee of 30 years. It claims the modules have low degradation rates.

Where is Trina Solar distributed?

Trina Solar now distributes its PV products to over 100 countries all over the world. We are committed to building strategic, mutually beneficial collaborations with installers, developers, distributors and other partners in driving smart energy together.

Does Trina Solar offer a warranty?

Trina Solar offers a product guarantee of up to 25 years and a performance guarantee of 30 years. It claims the modules have low degradation rates.
