Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

Can solar panels be mounted on a racking system?

They can be attached directly to the roof or mounted on a racking system. Seek advice from a solar installer to determine the most suitable mounting system for your specific requirements. Prior to installation, gather all the necessary tools and equipment, including solar panels, mounting brackets, rails, flashings, and fasteners.

What is a good roof angle for solar panels?

In the Northern Hemisphere, a south-facing roof pitched between 30 and 45 degrees is considered ideal for solar panels. Your roof should be in good condition and able to support the additional weight. You should also identify obstructions, such as nearby trees or buildings, that could cast shadows on your panels.

Are solar stack roof mounting systems UL 2703 listed?

Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.
