

# What to do with solar generators

What can you do with a solar generator?

**Backyard Parties:** Use a solar generator to liven up outdoor areas for social gatherings. A generator can give power to a stereo system and a TV or movie projector for fun nighttime viewing under the skies. **Worksites:** When working at a job site without electricity, you can use a portable generator to power tools, lights and more.

What is a solar generator?

Solar generators are portable battery storage systems powered by solar panels. Unlike solar-plus-storage systems, solar generators are not designed to back up major appliances in the event of an outage. You can compare solar generators by assessing the watts and watt-hours of the systems, as well as their battery chemistries.

Can a solar powered generator power a house?

A solar-powered generator with a higher power capacity can even power household appliances in the event of a power outage. And the fact that these are solar-compatible means you aren't reliant on the electrical grid to recharge them. What is the best way to charge a generator?

Can a solar generator power appliances?

If you want a solar generator that can power appliances whether it's at home, in your RV, off-grid or anywhere else, our top pick is the Bluetti AC200L. It can power just about any appliance, has plenty of outlets to run multiple appliances and features expandable capacity so you can fit it to your needs. Can power most household appliances.

Can a solar generator be used as a backup?

You can also use a solar generator as a backup to operate key items around your home in the event of a power outage. However, solar generators work differently from gas, diesel or propane-powered models.

Can a solar generator be used with solar panels?

A solar generator must be able to be recharged using sunlight, but these power stations aren't designed to be used exclusively with solar panels. You can charge them up more quickly via a standard AC outlet. This is preferable when available, so you may not need to bring out your solar panels at all.
